Plug & Play Sound Upgrade

## 12 Check settings

If the sound isn't as it should be, you can check that the following settings are correct.

POW ON SEL  
Set to «SPK»

Point upwards

## 13 Settings

We have set up the package with neutral settings on the car radio in the car.

Of course, you can adjust this, but we must ask to show consideration for major changes here. More power has been added and then one can also more easily damage the speakers at high volumes.

---

All speakers are damaged by misuse. Make sure you do not play too loudly so that the speakers' coil burns off. This is not covered by warranty or claims.
